

CSCI 3308
Lab 9: Kick Start Project
25 October 2024

1: Team Number:

Section 015 Group 07

2: Team Name:

Team ascend

3: Team Members:

Eleanor Blair, Brittany Lewis, Owen White, Adam Gebben

4: Application Name:

ascendify

5. Application Description

Our application will contain a list of climbs and a database of climbs and a database of users in which users are able to post reviews / accents of climbs, where these accents are visible to other users. There will also be a feature to follow other climbers, and there will be a focus on feature accents of people you know.

6: Vision Statement

For American climbers, Who want a way to track their climbing and interact with climbing peers. The [product name] is a social media/climbing tracking app that provides excellent search categories to find new and interesting climbs while being able to check in with your peers. Unlike 8a.nu, our product is local and specific to the front range area .

7: Version Control

<https://github.com/elblair/Acendify>

8. Development Methodology

Agile!!

9. Communication Plan

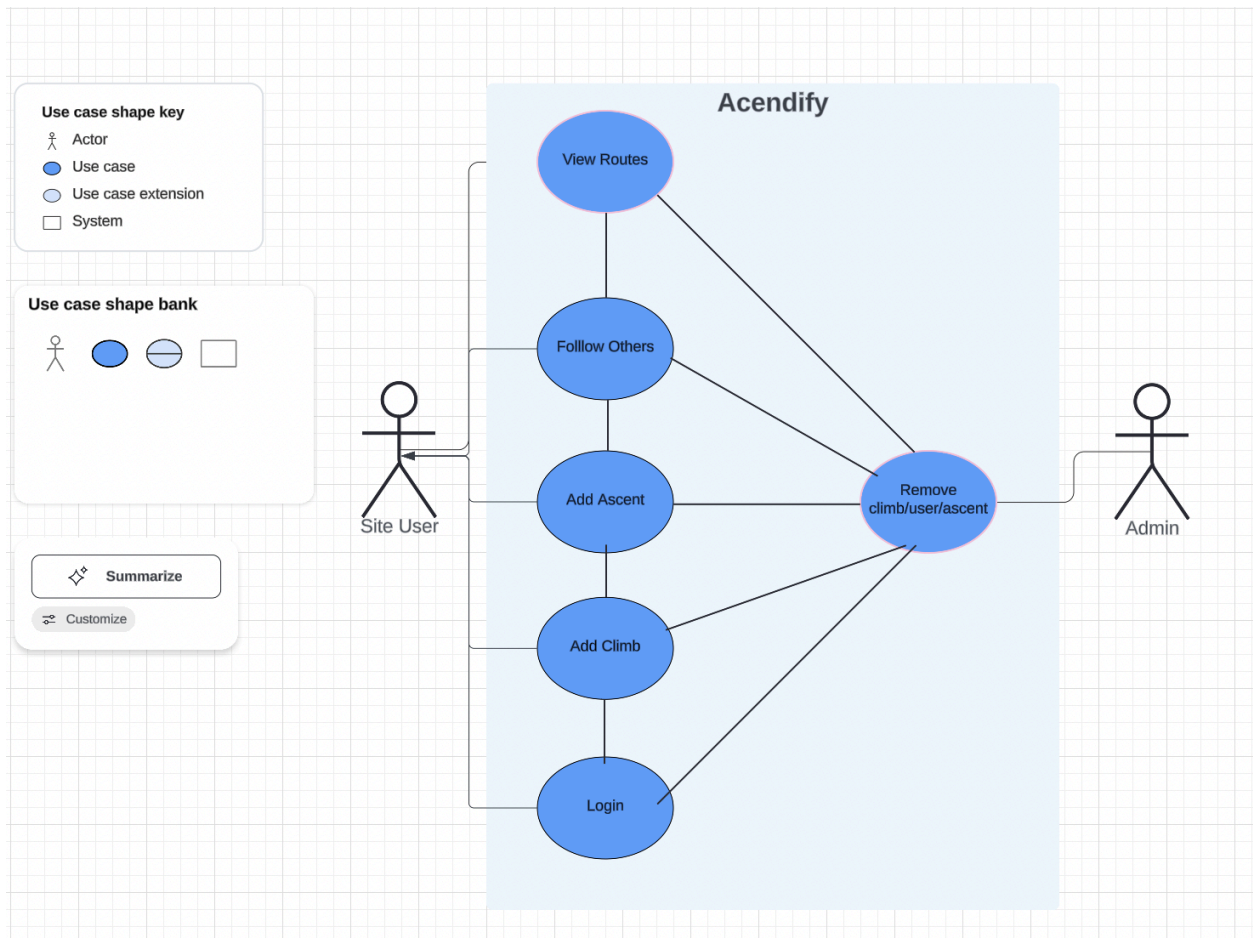

We plan to use a combination of google docs and slack.

10. Meeting Plan

Team Meeting: Tuesdays at 3:30 pm at Engineering Center

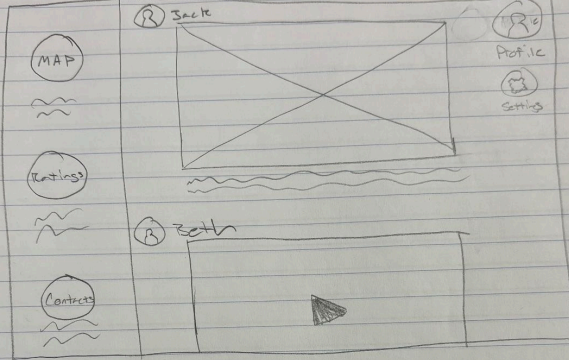

Weekly Meeting with TA: 5:00 pm on Wednesdays on Zoom

11. Use Case Diagrams

12. Wire Frames

Ascendify

Hand-drawn wireframe for the Ascendify app ratings screen. The layout includes a top navigation bar with a profile icon, a main content area with a 'Ratings' header and a table, and a bottom navigation bar with icons for 'Saved Climbs', 'Ratings', and 'Friends'. The 'Ratings' icon is accompanied by wavy lines representing data or lists.

	Boulder	Top Rope	Outside	Graph
Saved Climbs	~	~	~	
Ratings	~	~	~	
Friends	~	~	~
